

MEDIA RELEASE

## David Brown links quality and power transmission at QME

David Brown's engineered solutions for all power transmission requirements will be on display on **Stand 6071** during the 2008 Queensland Mining and Engineering (QME) exhibition at the Mackay Showground from July 22-24.

The David Brown name has been globally synonymous with quality power transmission products for more than 160 years and nowadays provides engineered solutions for power transmission needs from the smallest gear motor to 14 metre precision girth gears.

Its Bulli (NSW) plant has a recently commissioned load test facility of 1000 kW, expandable to 2000 kW.

The facility's test bed can assimilate 'in field' operating characteristics for both stand alone units and high voltage complete drive assemblies. Customers can also view real-time testing of their drives via secured web cam.
