

MEDIA RELEASE

Austdac to display variety of equipment at QME

Austdac, a specialist in mining and industrial communication, monitoring and control systems, will exhibit a broad range of equipment on **Stand 1074** during the 2008 Queensland Mining and Engineering (QME) exhibition at the Mackay Showground from July 22-24.

Products to be featured include conveyor and longwall systems, safety transmitters and relays, gas detection equipment, lighting, communications systems, cap lamps and self-contained rescuers.

On show will be:

- Austdac's AS61508 SIL (safety integrity level) 3-rated conveyor systems which have both audio and visual pre-start alarms, emergency stop, remote isolation, fault indication and lockout position on conveyor belts more than 8 km long
- solutions for non-IS conveyors and longwalls
- conveyor and longwall systems equipment including intelligent BMAS with LCD screens, combined pullswitch and conveyor stations (with or without keypads), standalone pullswitches and lockout and tailend units
- Austdac's Silbus safety transmitters and relays for upgrading existing conveyor systems to SIL 3
- gas detection equipment including smoke detectors, CH₄, Co₂ and infra-red sensors and IS vehicle gas monitoring equipment
- IS and non-IS LED cap lamps which have no bulbs to replace, an emergency LED and 12 hours use
- Lightweight CSE and Afrox self-contained self-rescuers.
- Austdac staff will also be available to discuss their extensive range of other products, including their lighting range and their surface-to-pit bottom communication systems.

Since 2006 Austdac has been part of the New York Stock Exchange-listed Hubbell Incorporated group, which manufactures electrical and electronic products for the commercial, industrial, residential utility and telecommunications markets.
