

MEDIA RELEASE

## Custom Fluidpower to show new handheld valve programmer at QME

**Custom Fluidpower** will display Sun Hydraulic's new range of amplifiers with embedded electronics and handheld programmer on **Stand 1120** during the 2008 Queensland Mining and Engineering (QME) exhibition at the Mackay Showground from July 22-24.

Offered in a wide range of control configurations and connector options, Sun's electro-hydraulic valves with embedded electronics can be used for both mobile and industrial applications. This means valves can be mounted close to actuators for improved performance, simplifying system plumbing and wiring.

The handheld programmer is used to set all the parameters for proportional valves with embedded, plug mount, ramping, and power saver amplifiers.

Sun Hydraulics, exclusively distributed by Custom Fluidpower, is a leading designer and manufacturer of high performance screw-in hydraulic cartridge valves and manifolds which control force, speed and motion as integral components in fluid power systems.

Custom Fluidpower is an Australian-owned company, offering a combination of hydraulic, pneumatic and lubrication products and services in a number of industries, including mining and material handling.
