
MEDIA RELEASE

Siemens to show large technology range at QME

Siemens is a technology-based solution provider in the areas of water, energy, environment, healthcare, productivity, mobility, safety and security and will display a wide range of its capabilities on **Stand 4011** during the 2008 Queensland Mining and Engineering (QME) exhibition at the Mackay Showground from July 22-24.

Siemens has a broad range of products for the mining and metals industries, including:

- automation systems, which use common products and engineering tools across a uniquely common communication protocol
- power distribution, switchgear, substations, transformers or reactors
- drives technology, ranging from frequency inverters and distributed drive systems to low-voltage motors
- sensors and communications, for flow, level, pressure, temperature measurement and weighing.

As well as having experts on hand at QME to discuss tailor-made solutions, Siemens' range of products on display at the exhibition will include mill drive, gearbox, sensors and controls for level, pressure and flow, electrical motor, variable speed drives and medium voltage switchgear.
