

## MEDIA RELEASE

# Pathtech highlights drug detection system at QME

**Pathtech - Drug Detection Systems** will display the Securetec DrugWipe® device on **Stand 2104** during the 2008 Queensland Mining and Engineering (QME) exhibition at the Mackay Showground from July 22-24.

DrugWipe is a rapid, efficient and reliable test for the detection of drugs in saliva, sweat or surfaces. This enables the detection of current and very recent drug use.

Single, twin or five-drug devices are available for cocaine, opiates, cannabis, amphetamines, methamphetamines (including ecstasy), and benzodiazepines.

One swipe of DrugWipe will detect the presence of drugs in the workplace.

DrugWipe advantages include:

- reduced testing time
- less intrusive sampling through a single wipe of the tongue
- sampling on- or off-site
- visual reading within 10 minutes
- suitable for random, for cause and post-incident testing.

Pathtech offers support and training to use DrugWipe, help with drug and alcohol policies and on-site testing. It follows the Australian standard procedures for specimen collection and the detection and quantitation of drugs in oral fluid , AS4760-2006.

Pathtech Drug Detection Systems specialises in drug detection and is the Australian and New Zealand supplier of Securetec Detektions Systeme AG.
