## **KSB introducing new pump technology at QME**

**KSB** will show off its pump technology for mining applications on **Stand 6003** during the 2008 Queensland Mining and Engineering (QME) exhibition at the Mackay Showground from July 22-24.

GIW (Part of the KSB Group), after years of development has introduced new products to the slurry pump market including the following;

- Ø MDX range of Hard Rock Mill Discharge Cyclone Feed Pumps
- Ø Full Rubber Lined Slurry Pumps
- Ø Expeller Style Slurry Pumps

Complimenting the entire KSB/GIW Slurry Pump range, these new developments will assist KSB in meeting and exceeding the mining industries expectations and specific site objectives.

Rubber impellers are not new to the slurry pump market, but GIW Industries engineers have taken them one step further by adapting its advanced hydraulics for metal pumps, GIW engineers have transferred this efficiency into a rubber-lined impeller design for the LCC-R.

The design includes GIW's patented impeller vane design and Solid/Fluid Flow Technology (SFT).

"With over 100 years of research and development experience, GIW has been able to patent many design and material innovations that have allowed us to deliver pumps that continually meet and exceed customers requirements in a variety of harsh environments," said Mr Mark Kuss.

"The MDX LSA series of slurry pump is the culmination of this experience and is especially suited for severe slurry transport applications such as hard rock cyclone feed circuits," said Mr Mark Kuss.

KSB's pump program covers a large spectrum, from process pumps or boiler feed units for large power plants to a complete range of mining and slurry pumps.

The products are complemented by KSB's range of services and are designed to safeguard the value of an installation and to provide fast assistance in emergencies.

Trained service technicians can take care of inspection, maintenance and repair of KSB's own as well as competitor products.

#### **ABOUT REED EXHIBITIONS – AUSTRALIA**

*Reed Exhibitions is the world's leading organiser of trade and consumer exhibitions and excels in creating high profile, highly targeted business and consumer exhibitions to establish and maintain business relations, and generate new business. From its offices based in Chatswood NSW, Reed Exhibitions runs over 20 events each year in NSW, Victoria, Queensland, South Australia and Western Australia covering a broad range of industry sectors. Globally, Reed Exhibitions runs over 460 events in 38 countries, bringing together over 90,000 suppliers and more than 5.5 million buyers. With 2,300 employees in 33 offices around the globe the company serves 52 industries worldwide. Its network of offices and promoters extends to 45 countries. Reed Exhibitions is a division of Reed Business Information Pty Ltd.*
